

JOIN THE WOMEN 4IMPACT COMMUNITY

WHO ARE WE?

Women4Impact are united in the pursuit of peace, democracy, sustainability and equality. We gain purpose and achieve happiness by elevating others. And nothing motivates and energises us more than collaborating with extraordinary women and men from all walks of life who share our drive and passion to make the world a better place.

WHAT ROLES DO WE PLAY?

We are change-makers who are creating new narratives and developing smarter models that enable all stakeholders to win. We are multigenerational leaders who are as committed to our personal lives as mother, spouse, partner, daughter and friend as we are to our professional lives.

We are:

- ◆ Business Executives who break down internal barriers to innovate
- ◆ Entrepreneurs who build social impact into our models
- ◆ Investors who commit our personal capital
- ◆ Philanthropists who fund the projects others won't
- ◆ Government leaders who proactively partner across sectors
- ◆ Community leaders who both plant and tend to the seeds

WHAT OUTCOMES DO WE EXPECT?

Time is our greatest asset. We only commit when our hearts and our heads tell us. At Women4Impact, we expect to achieve the following:

- ◆ To learn from and be inspired by the individual stories and experiences of change-making women and men from Bhutan and across the world,
- ◆ To reflect on our personal & professional roles, identify opportunities to improve our current models, and take home practical, results-oriented solutions,
- ◆ To connect the dots between our initiatives for logical collaboration,
- ◆ To recharge ourselves with fresh perspectives and fresh air, nature hikes, meditation and local excursions

WHAT IS THE OVERALL OBJECTIVE?

Together, we can scale our impact. We can increase the role of women in maintaining peace, spreading democracy, improving sustainability and achieving greater equality, at home and abroad. The next generation is counting on us.
